

Galvotec

Corrosion Services, LLC

**Since 1997,
Galvotec Corrosion Services LLC**

has been supplying a full range of cathodic protection services to the worldwide Oil and Gas market, which includes evaluation, system design, material supply, installation, and monitoring. We have a fully qualified cathodic protection team including engineers, certified field technicians, and experienced installation personnel. Through our Galvotec foundry we are able to offer a wide range of anodes, and our machining and fabrication capabilities allow us to offer a wide range of custom fabricated retrofit anode assemblies.

Anodes for Tanks & Pressure Vessels

Offshore Cathodic Protection Services

- Anode Retrofit Design
- Retrofit Anode Assemblies
- Cathodic Protection Surveys
- Deep Water Anode System Installation
- Computerized Reports and Documentation
- Fabrication of Anode Clamps and Hardware
- Impressed Current Systems Installed and Maintained
- Complete Project Management for CP Installations
- Remote CP Monitoring Devices and Installation
- Pipeline Retrofit Anode Design and Materials
- Pipeline Anode System Design
- Level I Offshore Surveys
- Pin Brazing

Onshore Cathodic Protection Services

- Rectifier Repair
- Deep Well Systems
- Interference Testing
- Solar Powered Systems
- Cathodic Protection Systems
- Cathodic Protection Materials
- Full Service Design and Installation
- Vessel and Tank Anode Systems
- Remote Monitoring Installation
- Systems for Docks and Piers
- Systems for Tank Farms
- Systems for Refineries
- Systems for Pipelines
- Pin Brazing
